Beta 1,3 Glucan
Immune and Cardiovascular support

DESCRIPTION
Beta 1,3 Glucan, available from Medical Wellness Associates, provides 50 mg of the dietary fiber beta-glucan, i.e. repeating units of beta-D-glucose joined together in beta-(1,3) linkages.

FUNCTIONS
Only recently has western science begun to investigate those mushrooms recognized through the millennia for their medicinal properties. Beta 1,3 glucans isolated from these medicinal mushrooms are thought to have a significant effect on the immune system’s functionality. The beta glucans’ modulation of the immune system may be mediated by altered activity of macrophages and T cells, elicited by the production and expression of various cytokines. Research has shown that some of these medicinal mushrooms possess immunomodulatory properties that may provide improved functional defenses against microorganisms. The glucose polymers of mushrooms have also been shown to promote the growth of beneficial, probiotic strains of intestinal bacteria. Dietary beta-glucans, e.g. from oat fiber, have been also been shown to improve lipid profiles related to cardiovascular health.

INDICATIONS
Beta 1,3 Glucan capsules may be a useful dietary supplement for those who wish to improve the function of their immune system as well as that of their cardiovascular system.

FORMULA (#83901)
Each Capsule Contains:
Beta 1,3 Glucan ................................................. 50 mg

SUGGESTED USE
Adults take 1 capsule daily or as directed by physician.

SIDE EFFECTS
No adverse effects have been reported

STORAGE
Store in a cool, dry place, away from direct light. Keep out of reach of children.
